The idea of the film

"The Attempt" is an artwork that highlights four different stories of characters seeking to change their reality through new projects.

Every story begins with great passion and ends in abject failure, but in a satirical way that touches deep human emotions, confirming that failure is nothing but a necessary stop.

Technical tools used

ChatGPT

To draft the script, organize the content, and assist in poster design.

Photoshop

For designing the visual identity and official poster.

Adobe Podcast

To improve sound quality and noise isolation.

CapCut

For film editing and precise scene merging.

Movie poster

The design reflects the state of confusion and ambiguity that the characters are experiencing; the blindfold symbolizes entering into new experiences without knowing the end.

We used dim lighting and cool colors to enhance the dramatic character of the film.

Thank you

We hope that this "attempt" will be the beginning of your future successes.
